

A hand-drawn technical diagram of a corner joint. The drawing is on a grid background. A green line represents a pipe or duct, forming a 90-degree corner. The corner is reinforced with a green L-shaped bracket. The text "DEMONTAZ" is written in large, green, block letters across the top. Below it, "2NP" is written in green. To the right of the corner, the number "15" is written vertically. At the bottom, the text "315/315" is written inside a rectangular box. Several thin black lines radiate from the corner, likely indicating measurement or alignment points.
